Information and Instructions

This individual shop manual is one unit of a series on wheel type tractors. Contained in it are the necessary specifications and the brief but terse procedural data needed by a mechanic when repairing a tractor on which he has had no previous actual experience.

The material is arranged in a systematic order beginning with an index which is followed immediately by a Table of Condensed Service Specifications. These specifications include dimensions, fits, clearances and timing instructions. Next in order of arrangement is the procedures paragraphs.

In the procedures paragraphs, the order of presentation starts with the front axle system and steering and proceeding toward the rear axle. The last paragraphs are devoted to the power take-off and power lift systems. Interspersed where needed are additional tabular specifications pertaining to wear limits, torquing, etc.

HOW TO USE THE INDEX

Suppose you want to know the procedure for R&R (remove and reinstall) of the engine camshaft. Your first step is to look in the index under the main heading of ENGINE until you find the entry "Camshaft." Now read to the right where under the column covering the tractor you are repairing, you will find a number which indicates the beginning paragraph pertaining to the camshaft. To locate this wanted paragraph in the manual, turn the pages until the running index appearing on the top outside corner of each page contains the number you are seeking. In this paragraph you will find the information concerning the removal of the camshaft.

INDEX (By Starting Paragraph)

	THE COLUMN
BRAKES	ENGINE, CONT.
CAB	Valve Adjustment
	Valve Guides and Springs
CARBURETOR, GASOLINE94	Valve Rotators
CLUTCH, SINGLE DISC135	FINAL DRIVE GEARS
CLUTCH, DUAL DISC	FRONT AXLE
CLUTCH, POWER TAKE-OFF 231, 243	GOVERNOR:
COOLING SYSTEM:	Diesel 117 Non-Diesel 119
Radiator	Non-Diesei
Thermostat	HYDRAULIC LIFT SYSTEM:
Water Pump123	Adjustments
	De-Luxe Control Valves
DIESEL FUEL SYSTEM:	Lift Cover Assembly, R&R
Bleeding	Lift Cylinder, Overhaul
Filters 103 Injection Pump 114	Pump (Piston Type)
Injection I timp Injector Nozzles	Pump (Engine Mounted Gear Type)
Troubleshooting95	Pump (Internally Mounted Gear Type)
	Pump (Engine Mounted Tandem Gear Type)289
DIFFERENTIAL	Remote Control Valves
	Selector Valve
DIFFERENTIAL LOCK	Thoughlashasting
DIFF EIGHTIAL LOCK	Troubleshooting253

DUAL DIMENSIONS

This service manual provides specifications in both the U.S. Customary and Metric (SI) systems of measurement. The first specification is given in the measuring system perceived by us to be the preferred system when servicing a particular component, while the second specification (given in parenthesis) is the converted measurement. For instance, a specification of "0.011 inch (0.28 mm)" would indicate that we feel the preferred measurement, in this instance, is the U.S. system of measurement and the metric equivalent of 0.011 inch is 0.28 mm.
